

DidiSoft OpenPGP Library for Java

OpenPGP encryption for Java

DidiSoft OpenPGP Library for Java is a software library providing OpenPGP cryptography methods for the Java VM (Virtual Machine).

The library provides all the standard OpenPGP cryptography methods including encryption, decryption, creating and verifying digital signatures, combined one pass signatures and encryption, clear text and detached signatures.

Key management functions and connectivity to OpenPGP key servers are also available.

Compatibility

The output and input of the library is fully compatible with all the OpenPGP compliant software available on the market, including Symantec products, GnuPG/gpg, etc.

PRODUCT SUMMARY

- OpenPGP encryption for Java
- Thorough API documentation, tutorial and example applications
- Compliant output and input with all other OpenPGP software applications available on the market.
- Easy API with short learning curve.

DidiSoft OpenPGP Library for Java

OpenPGP encryption for Java

Designed for Java Developers

The library is designed to provide easy API for OpenPGP cryptography with short learning curve. An online tutorial is available with detailed examples in the Java programming language.

High security

The public and private keys used in the OpenPGP encryption can be stored inside our own key storage file format protected with AES-256 bit encryption.

Full OpenPGP support

All the current OpenPGP Standard specifications are supported (RFC 4880, RFC 6637).
